

SOLEMLUX

SINCE 2008

About us

UAB "SOLEMLUX" was launched in 2008 by a small but very obstinate team. Within just 10 years the company has become one of the leaders in the blinds and other sun protection products market in Lithuania.

UAB "SOLEMLUX" offers a wide range of products to its customers: pleated and roller blinds, roman blinds, venetian aluminium and vertical blinds suitable to various types of windows, also wooden blinds, wide variety of insect screens, automated window control solutions. Window coverings are a very important part of an interior able to become an accent or an integrated design element for any home.

Brand name SOLEMLUX was introduced in 2018. Introduction of this brand has become a transition to a new stage of development, as at the same time our business has started to expand rapidly both in Lithuanian and foreign markets. It is symbolic that in that same 2018 the company was awarded a mark "Strongest in Lithuania" and given the honourable Gazelle Award of the year as one of the most rapidly growing businesses in Lithuania. Undoubtedly, it has happened because we are practically the only one of major manufacturer of sun protection products who are engaged in that field only. So, we are able to devote all our time and energy to one clear trend.

SOLEMLUX

SINCE 2008

Team is our strength

We are proud of our team. The company has achieved such good results only through harmonious team and purposeful work. SOLEMLUX team comprises specialists of various fields having long-term experience of work with blinds.

Continuous improvement

We have committed to ourselves and our customers to continuously improve qualification of employees and quality of products. We are improving by widely using annually launched modern and increasingly user-friendly solutions. All products sold by Solemlux conform to up-to-date worldwide trends and quality standards.

Rapid grow

Due to rapid grow of customer network and increase in a number of orders a new spacious 1500 m² plant was built in 2018. It has been equipped with modern equipment ensuring more convenient work for employees, higher output, wider opportunities, modern resource management, and higher product quality.

Always next to a customer

Our vision: modernity and innovation of our products which would help to create contemporary and individual style in any home.

We are flexible, respect our customers and mind their needs at every stage of cooperation.

SOLEMLUX key values inextricably linked to the company are:

- Modern, premium quality sun protection solutions for your home;
- Safe, approved and customer-friendly products;
- Prompt solving of a customer's problem;
- Attention to every customer;
- Optimum price-quality ratio;
- Availability of products both in Lithuanian market and foreign markets.

Pleated blinds

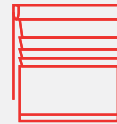

Modern way to cover windows enriching your home with exclusive elegance and modernity. Uniqueness of this alternative: fabric pleated in small folds. The most important feature of pleated blinds: they may be adjusted not only to windows and doors of different types but also of different sizes and forms.

Roller blinds

The perfect solution for people wishing both to revive the interior of their home, create accents in premises or add new colours and ensure protection from light and eyes of neighbours. Thus, it is not only a protection and interior element but also a way to create more privacy and cosiness at your home.

Roman blinds day - night

Those who doubt about what to choose, roller blinds or curtains, SOLEMLUX offers to choose an original way to cover windows – roman blinds. The roman blinds are easy and simple to use. When raised, they stack in horizontal folds and become a modern part of the interior that suits any style. This choice ensures grace, cosiness and elegance.

Venetian blinds

The convenient alternative that suits perfectly for covering windows both of residential premises, offices or public institutions and protect premises from heat. Venetian aluminium blinds are universal and easily adjustable both to plastic and wooden or aluminium windows. These blinds will also fit perfectly home interior with classic and modern style combined.

Vertical blinds

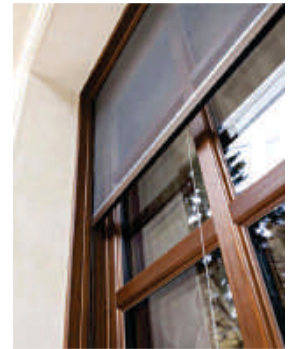

They are widely used both for customer homes and offices or other premises. Such type of window covering is used most often because of functionality and reliability of those blinds. The vertical blinds may perform function of both day and night curtains. Moreover, they add esthetic appearance and cosiness to premises.

Mosquito nets

During the warm season the most irritating thing is annoying insects in a room, which not only produce annoying sounds but also bite, disturb your sleep or hinder you from enjoying freshness of the evening. So, if you wish to open windows in your room without fear, it is worth choosing protective insect screens. We may offer screens of different types, considering personal needs of each customer.

Wooden blinds

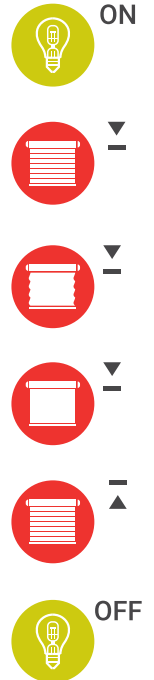

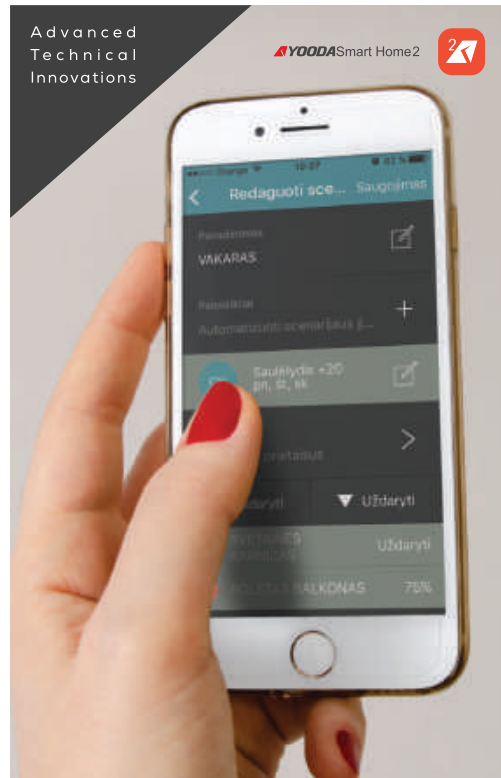

They are made of solid, easy slats of natural wood, so they both create an exclusive, luxurious interior in your home and ensure perfect protection from sunlight. Easy to use, highly functional and universal blinds are easily adjustable to interiors of various styles.

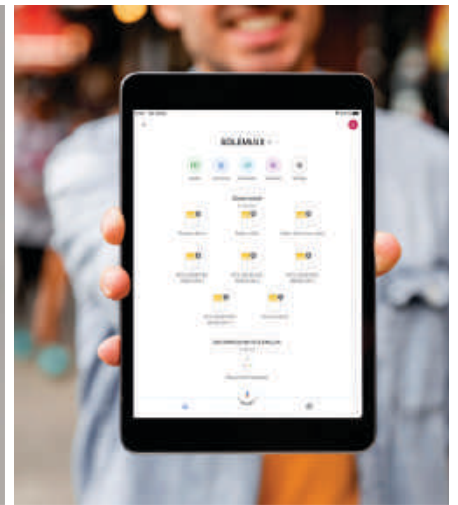

Automation blinds Smart Home solution

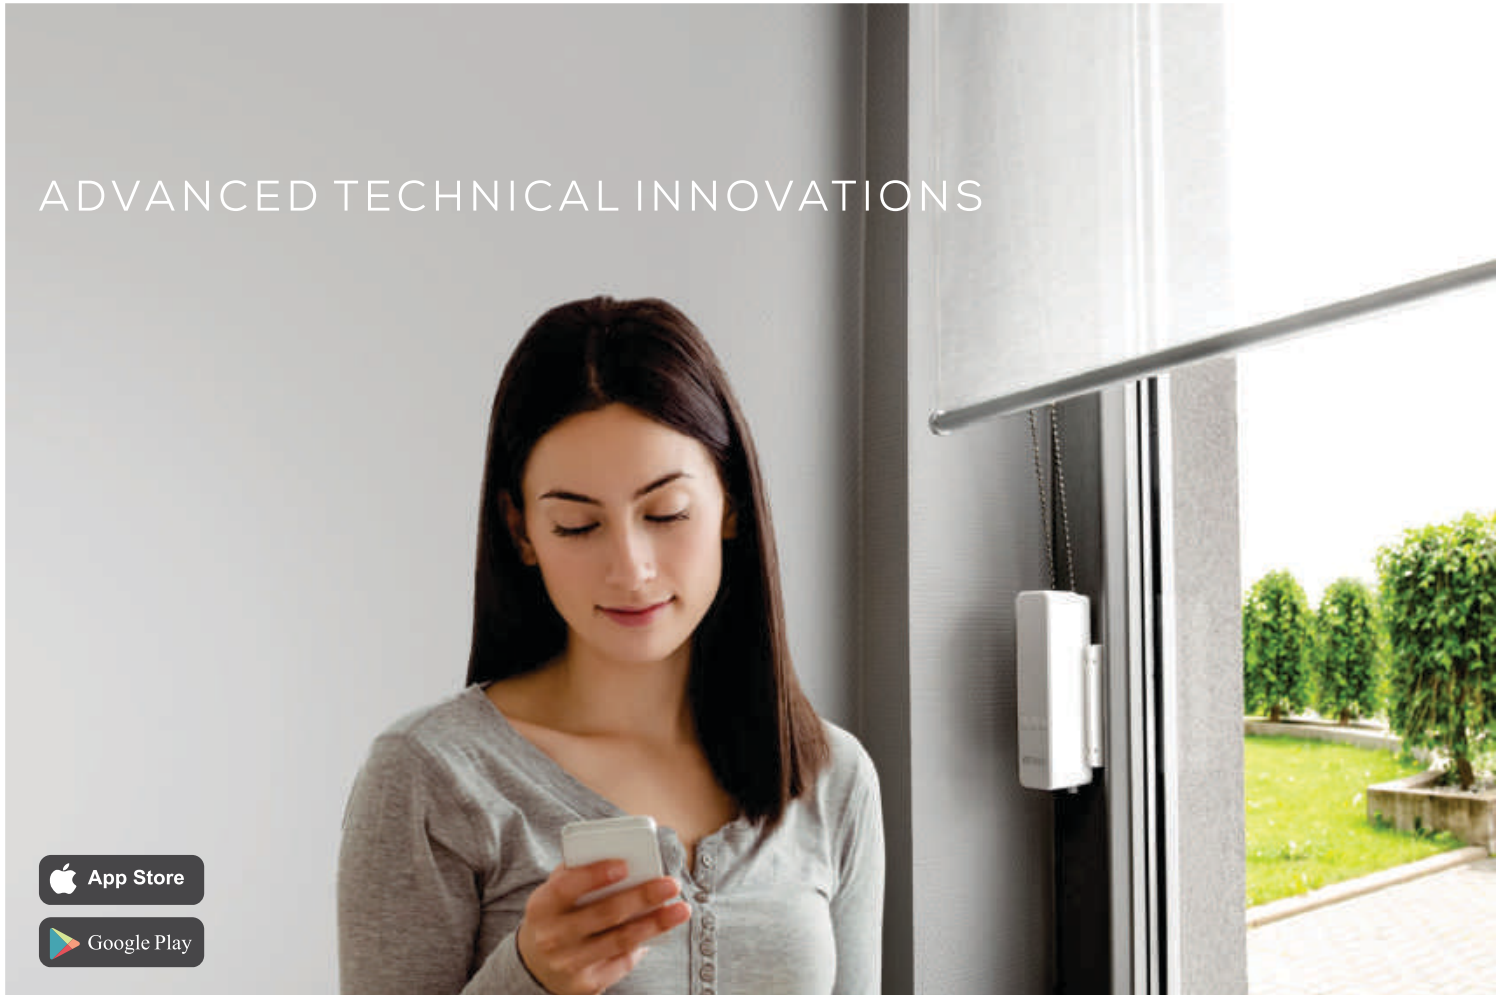

SOLEMLUX is continuously searching for innovations and offers the most advanced technical solutions to its buyers. We have recently introduced a possibility of automatic operation that allows convenient remote blind control. This function gives you a possibility to raise or lower a window covering with your voice by using smart devices or remote controls. It is possible to control even if you are not at home. Remote control is especially convenient if you wish to ensure comfort temperature at home. If you wish the sun not to overheat your home, just start an app on your phone and lower window coverings remotely.

SOLEMLUX
SINCE 2009

ADVANCED TECHNICAL INNOVATIONS

“SOLEMLUX” - environment friendly company

At present we are making step towards cleaner world and we are the first in Lithuania to present new ECO - material, which is made from 100 percent recycled polyester. The usage of such material in our business is very wide. This material can be used to make roller blinds.

Every year scientists warn about environmental resources and limits of nature's resources

Human population is constantly increasing and resources are decreasing, therefore we should use all of our know-how methods to find proper solutions to solve this situation. One of such methods is the secondary recycling of raw materials, which lets to use our possessed resources and to decrease the negative impact for the environment.

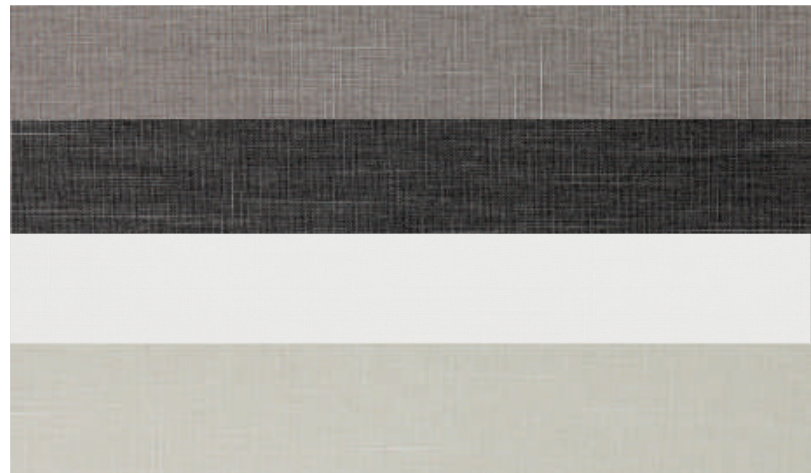

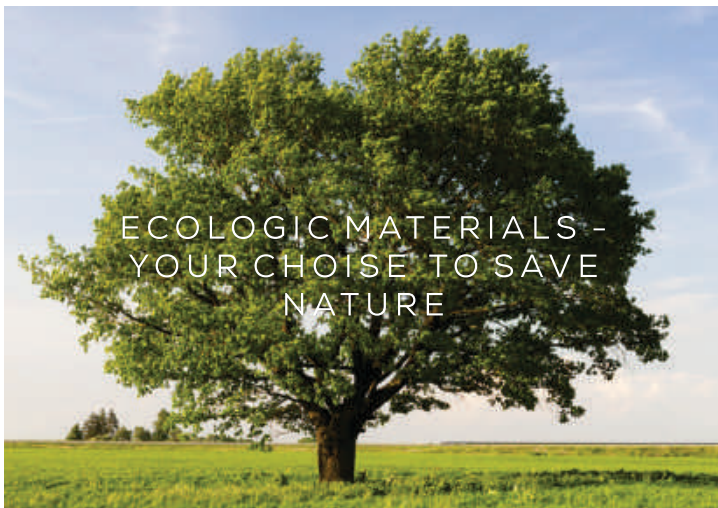

New ECO - material, which can be viewed in our salons, is tested and it meets „100 by OEKO-TEX®“ standard before releasing it to market

It is independent global textile production testing and certification system. Also material meets „STeP by OEKO-TEX®“ certification system, which unites textile brands, which are characterized by criteria of transparency, openness and reliability.

Customers have opportunity to choose from few neutral ECO - material colors, which are easily adjusted to different types of the interior.

Choosing recycled products buyers contribute to reduction of environmental pollution

It is very important that it is production made from secondary raw materials, in this case it is eco - material, which has the same appearance as the simple material of blinds or rollers, also it is has the same functions and properties.

By using this material at home every person will contribute to nature cleansing and will be able to swagger by such decision before his friends or neighbors. After all nature protection is not only useful, but also fashionable!
